- Build Tools: Gradle, Maven
- Tools & IDEs: VS Code, IntelliJ IDEA, Android Studio, Figma

WORK EXPERIENCE

Full Stack Developer | TATA CONSULTANCY SERVICES LIMITED 2021- Present

- Developed and maintained the **UI of Ignio environment** using **Angular**, focusing on **enhancing UX/UI design, implementing new features, and customizing existing functionalities**.
- Designed and developed **RESTful APIs using Spring Boot**, ensuring efficient data exchange between frontend and backend services.
- Integrated APIs into the Angular frontend**, enabling seamless user interactions and dynamic data handling.
- Optimized application performance** by implementing best coding practices, reducing API response times, and improving UI responsiveness.
- Implemented **Jenkins-based CI/CD pipelines** to automate the build, testing, and deployment process, ensuring faster and more reliable updates.
- Deployed applications in a **Dockerized environment**, ensuring scalability and smooth deployment across different platforms.
- Worked with **MySQL/PostgreSQL** databases, handling data modeling, writing optimized queries, and managing backend data storage.
- Followed **Agile methodologies**, participating in sprint planning, daily stand-ups, and retrospectives to enhance productivity and team collaboration.
